SUMMARY

Seeking an entry-level Full Stack Developer role in a forward-thinking organization where I can enhance my programming skills, learn new frameworks, and actively contribute to innovative software projects that solve real-world problems. To join a collaborative software development team as a Full Stack Developer where I can apply my technical skills, creativity, and logical thinking to deliver quality solutions while gaining professional experience and continuous learning opportunities.

EDUCATION

Bachelor of Technology in Information Technology

2022 - 2026

Ponjesly College of Engineering -Nagercoil

Anna University | CGPA: 8.1

SKILLS

Programming : Python
Frontend : HTML, CSS, JavaScript
Database : MySQL
Tools : VS Code ,Git ,GitHub, Figma
Frameworks / Libraries : Flask, Pandas, NumPy, Scikit-learn, OpenCV

INTERNSHIP EXPERIENCE

AI/ML Internship – Alo Info-Tech Pvt. Ltd.

2025

- Completed hands-on training on Machine Learning and AI algorithms, covering supervised and unsupervised learning.
- Practiced model building using datasets and tools like Scikit-learn, Pandas, NumPy, and Matplotlib.
- Implemented small real-time mini projects including prediction models and computer vision tasks.

PROJECTS

AI-Enabled Blockchain Certificate Verification System(Full Stack Development)

- Developed a secure web-based certificate verification system using QR codes and blockchain concepts to ensure tamper-proof and transparent certificate validation.
- Implemented backend functionality using Python Flask with AI-based forgery detection to identify manipulated certificates and verify authenticity.

Tech Stack: Python (Flask), HTML, CSS, JavaScript, MySQL, Private Blockchain, AI-based Forgery Detection

Cinematic Studio Website & Booking System (Full Stack Web Development)

- Developed a responsive studio portfolio website with cinematic UI and booking features.
- Implemented gallery management, contact forms, whatsapp integration and Firebase integration.

Tech Stack: HTML, CSS, JavaScript, Firebase

Second-Hand Car Price Prediction (ML Model Deployment)

- Built an end-to-end ML web app for second-hand car price prediction using Python, Flask, and Scikit-learn with real-time input processing.
- Applied data preprocessing, feature encoding, and tokenization to improve model accuracy and demonstrate full-stack ML deployment.

Tech Stack: Python, Flask, HTML, CSS, JavaScript, Pandas, NumPy, Scikit-learn, Tiktoken, Hugging Face Datasets

ACHIEVEMENTS & CERTIFICATIONS

- Winner – Smart India Hackathon (SIH 2025) Internal Round; shortlisted for National Round
- Robotic Process Automation (RPA) Certification — Naan Mudhalvan & UiPath
- OpenCV Certification — Naan Mudhalvan & GUVI
- Generative AI in Action Certification — IBM SkillsBuild
